

Ingalls Government Programs

Enabling Innovation Through Better Cyber Risk Management

Ingalls' Government Programs Team provides integrated technology-enabled, cybersecurity risk management solutions that support rapid innovation for the entire DOD ecosystem. Core capabilities and services include:

CMMC Preparation & Readiness

As a CMMC Registered Practitioner Organization (RPO) with Registered Practitioners (RP) and a Certified CMMC Professional (CCP) on staff, Ingalls' consulting experts are dedicated to assist Defense Industrial Base (DIB) companies with all aspects of implementation of a CMMC-compliant program that ensures the security of Federal Contract Information (FCI) and Controlled Unclassified Information (CUI).

ATO/RMF Advisory Support

Ingalls provides ATO/RMF Advisory Support throughout the RMF Lifecycle with a tailored approach for services. We offer a wide variety of customizable solutions, programs, and tools to streamline the path to Authorization to Operate (ATO) approval. We offer additional support including Information System Security Officer (ISSO) and Information System Security Manager (ISSM) services.

CSAR/RMF Pro

Our cutting-edge tool employs an automation-driven modular approach while keeping a human-in-the-loop to actively review applications for accuracy and provide feedback, guiding the user forward to a "mature cyber environment" and on path toward an authorization decision. The entire experience offers refined processes to reduce chance of errors, confusion, and fatigue and provides the following benefits:

- Intuitive dashboard
- Mapping of mandatory forms
- Human-in-the-loop (Dedicated SME)
- Cyber plans & playbooks

For any licensing and contract questions, please contact **Connie Hernandez** at connie.hernandez@iinfosec.com.
